

This is an impressive presentation, it speaks volumes; the visual images creates an instant effect and lasting memory. Make sure and share.

4.2 gms = 1 teaspoon of sugar, so this looks like 1 cube is about the same!

WHAT A UNIQUE WAY TO PRESENT THIS...

Someone ought to get an award for this.

We know the facts, but this brings it into perspective quickly, doesn't it? Each cube is a teaspoonful.

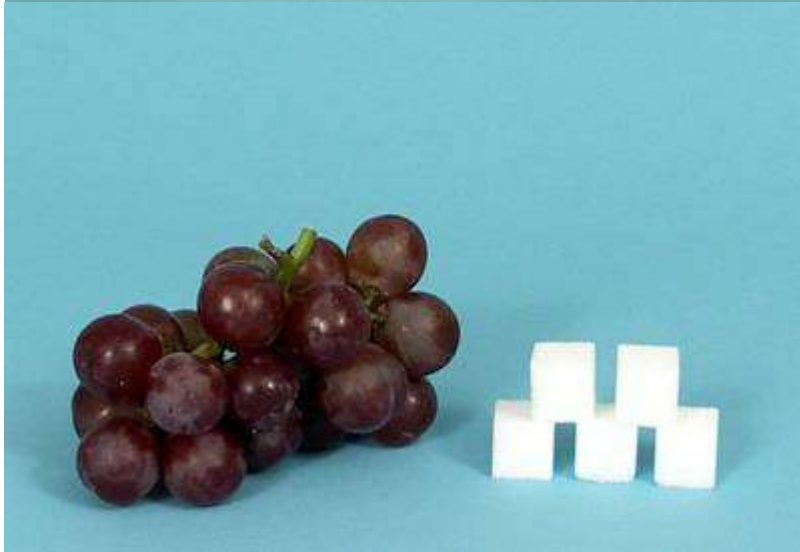

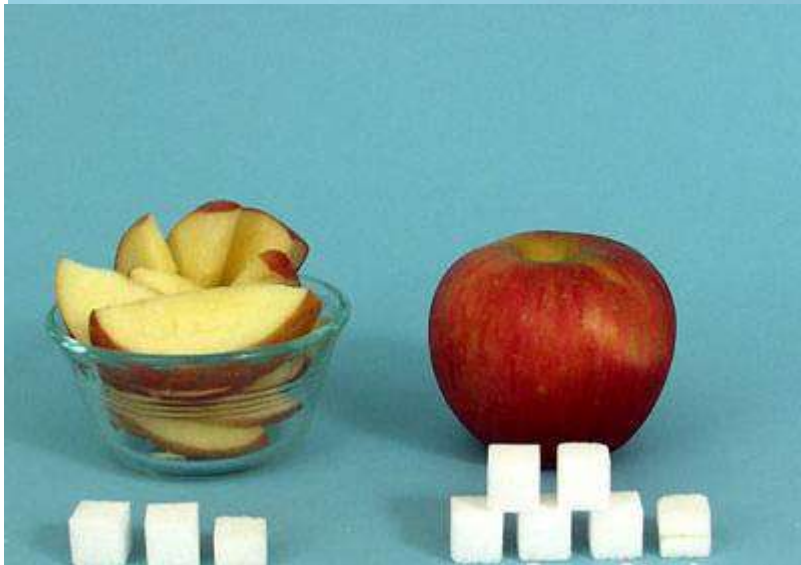

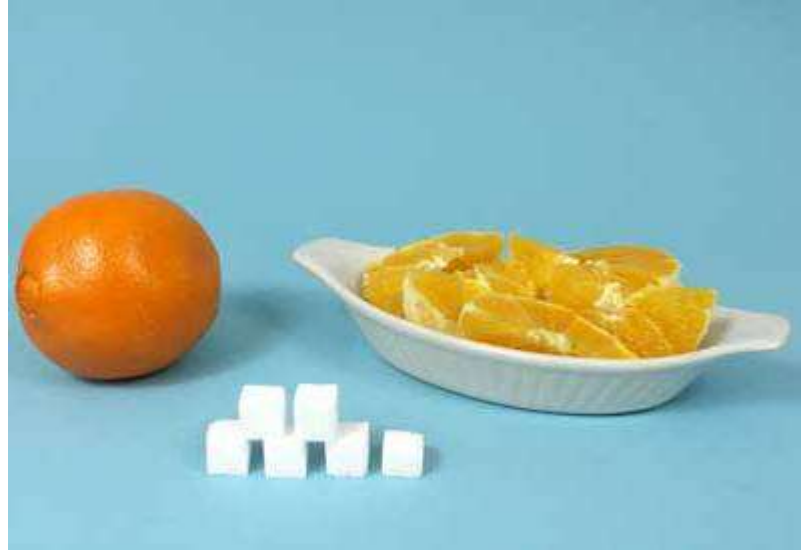

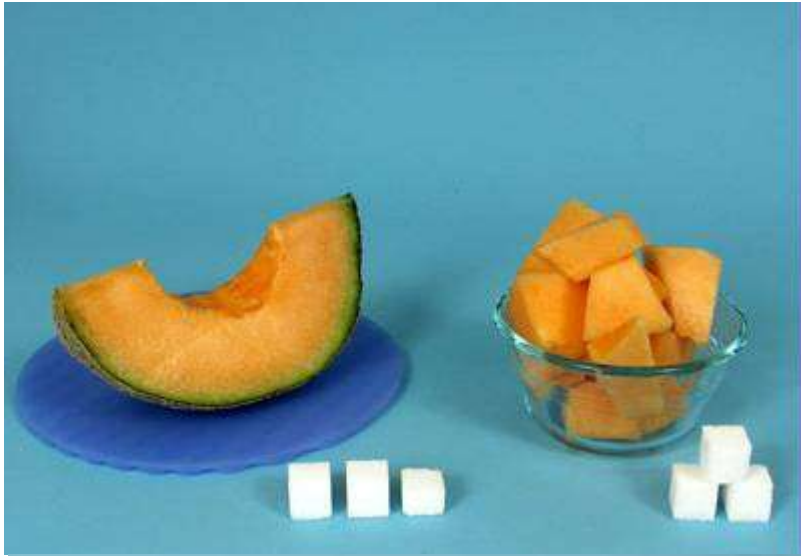

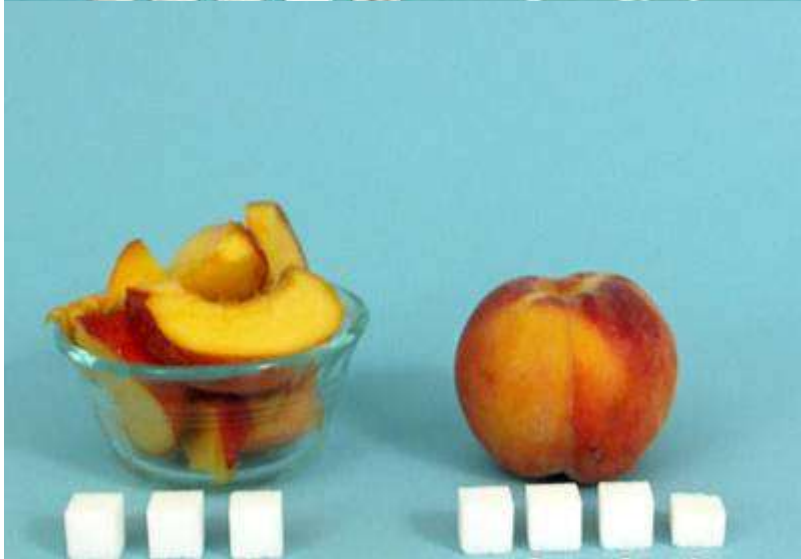

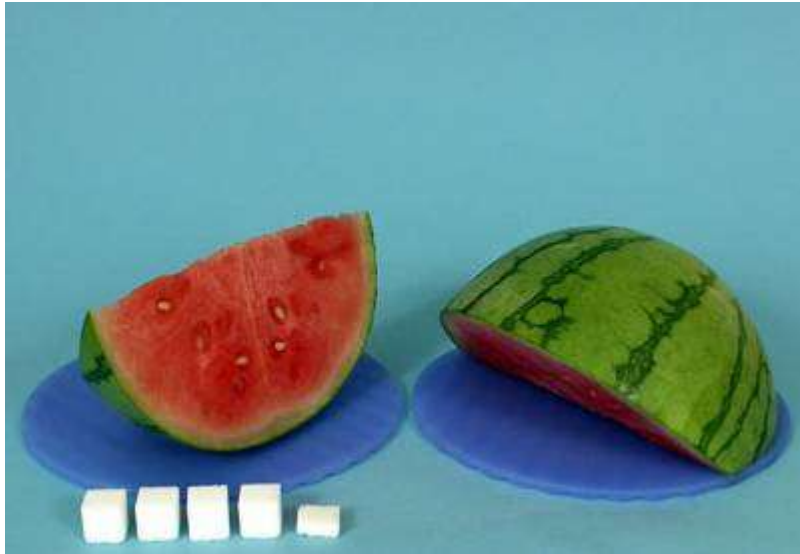

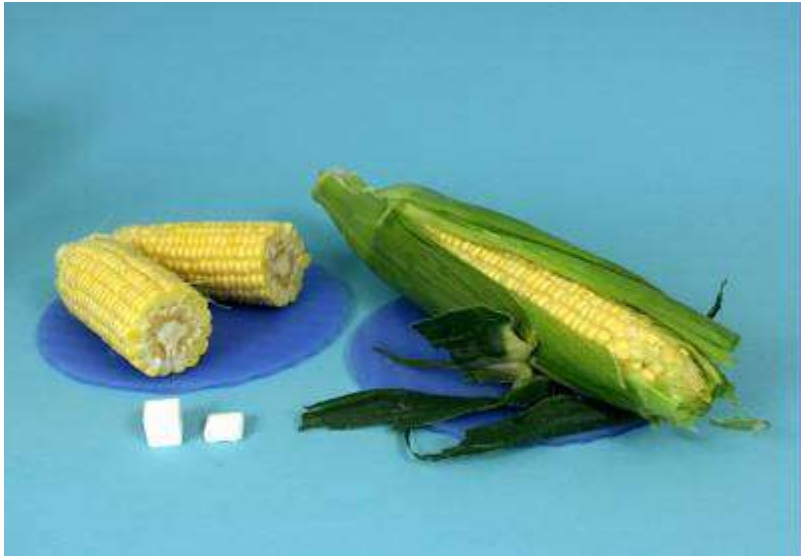

From now on it's strawberries, carrots, Cheerios, Special K and corn for me.

Pass it on, share something of value that they can benefit from.
